 - Percentage: 76 %
- ❖ Computer Science (X) | CAA Model School-2.
 - July 2020-July 2022
 - Percentage: 90 %

ACADEMIC PROJECTS

- ❖ **AI-Powered Islamic Assistant – Built with Streamlit + Gemini Flash 2.0 API.**
A smart, multi-language Islamic chatbot that answers questions about Islam using authentic sources like the Qur'an and Hadith and manage chat history.
<https://islamic-chatbot-huzaifa-nawaid.streamlit.app/>
- ❖ **MUSCLE-HUB - A Gym Management System with MySQL + EmailJS API.**
The Gym Management System (GMS) is a highly modernize and reliable Java-based desktop software application designed to revolutionize the management of gyms and fitness centers.
https://github.com/HuzaifaNawaid/GYM_MANAGEMENT
- ❖ **CHOPPER CHAOS – A Offline Desktop Game on Windows Form (C#).**
Chopper Chaos is an engaging 2D offline game designed to provide dynamic gameplay while eliminating internet dependency. Players control a chopper, navigate through obstacles, dodge enemy attacks, and shoot UFOs while tracking their score.
<https://github.com/HuzaifaNawaid/CHOPERCHAOSFINAL>
- ❖ **JARVIS – Your Personal Voice Assistant.**
JARVIS is a Python-based voice assistant that can perform various tasks, such as searching Wikipedia, opening websites, sending WhatsApp messages, and controlling your PC. It uses speech recognition to take voice commands and responds using text-to-speech.
